ABOUT US

Wellness Tech Bio Distribution

Compounded Precision Medicine · Physician-Supervised Protocols

OUR MISSION

Wellness Tech Bio Distribution is a premier supplier of compounded 503A and 503B pharmaceutical-grade peptide therapies and GLP-1 products. We partner exclusively with licensed physicians and medical practices to deliver precision medicine that is individualized, evidence-informed, and results-focused.

WHO WE SERVE

- Medical practices & weight loss clinics
- Anti-aging & longevity medicine specialists
- Sports medicine & performance physicians
- Hormone therapy & functional medicine providers
- Aesthetic & regenerative medicine practices

OUR PROMISE

Every product in our catalog is compounded under strict 503A/503B guidelines. All orders are physician-prescribed, batch-tested, and dispensed with complete traceability — because your patients deserve nothing less.

WEIGHT MANAGEMENT

GLP-1 & Dual Agonist Therapies

Semaglutide · Tirzepatide · Retatrutide · Sublingual & Injectable

GLP-1

Semaglutide
+ Glycine or B12

GLP-1+GIP

Tirzepatide
dual agonist

TRIPLE

Retatrutide
GLP-1+GIP+Glucagon

SUBLINGUAL

Needle-free
oral delivery

Product	Concentration	Vial Size	Route
Semaglutide + Glycine 2.5 / 5 / 12.5 mg	2.5-3.125 mg/mL	1-5 mL	SubQ Injection
Semaglutide + B12 2.5 / 5 / 12.5 mg	1.25-3.125 mg/mL	2-4 mL	SubQ Injection
Tirzepatide 18 / 36 / 72 mg	9-18 mg/mL	2-4 mL	SubQ Injection
Tirzepatide + B12 17 / 34 / 68 mg	8.5-17 mg/mL	2-4 mL	SubQ Injection
Sublingual Semaglutide 2 / 4 / 6 / 8 / 10 mg	2-10 mg/4mL	8 mL	Sublingual
Sublingual Tirzepatide 5-30 mg	5-30 mg/4mL	8 mL	Sublingual
Sublingual Tirzepatide + NAD+ 5-17.5 mg / 100 mg	5-17.5 mg/mL	8 mL	Sublingual
Retatrutide™ (Triple-Agonist) 1-12 mg	≈13.3 mg/mL	3 mL Pen	SubQ — Once Weekly

COMMON SIDE EFFECTS (GLP-1 Class)

Nausea · Vomiting · Diarrhea · Constipation · Decreased appetite · Injection-site reactions · Headache · Fatigue

CONTRAINDICATIONS: Personal/family history of medullary thyroid carcinoma (MTC) or MEN2 · Pregnancy · Severe GI disease · Pancreatitis history

RETATRUTIDE™ — TRIPLE-AGONIST

GLP-1 · GIP · Glucagon Receptor Agonist · Metabolic Support

40 mg / 3 mL Prefilled Injectable Pen · ≈13.3 mg/mL · Once-Weekly SubQ

WHAT IT IS

Retatrutide is an investigational triple-agonist peptide targeting GLP-1, GIP, and glucagon receptors simultaneously — supporting appetite control, metabolic efficiency, and accelerated fat loss through three distinct hormonal pathways.

HOW IT WORKS

Retatrutide enhances insulin sensitivity, increases energy expenditure, suppresses appetite, and promotes fat oxidation through combined GLP-1, GIP, and glucagon pathway activation — a mechanism unmatched by single or dual agonists.

WHY RETATRUTIDE™?

- Supports significant weight and fat loss
- Improves insulin sensitivity and metabolic health
- Enhances energy expenditure
- Reduces appetite and cravings
- Supports long-term body composition goals

COMMON SIDE EFFECTS

Nausea · Vomiting · Diarrhea · Constipation · Decreased appetite · Injection-site reactions · Tachycardia (rare) · Gallbladder issues (rare)

CONTRAINDICATIONS: Personal/family history of medullary thyroid carcinoma (MTC) or MEN2 · Pregnancy · Pancreatitis history · Severe GI motility disorders

⚠️ Investigational compound — physician prescription and supervision required. Not FDA-approved.

DOSING GUIDE

PEN CONCENTRATION

40 mg / 3 mL · ≈ 13.3 mg per mL · 0.1 mL (10 clicks) ≈ 1.33 mg

Tier	Dose	Clicks
Microdose	1 mg	7–8 clicks
Standard	2 mg	15 clicks
	4 mg	30 clicks
	6 mg	45 clicks
	8 mg	60 clicks
	10 mg	75 clicks

FREQUENCY: Once weekly SubQ injection

TITRATION: Increase dose every 3–4 weeks as tolerated

CYCLE: Long-term use with periodic provider reassessment

Dosing may be individualized by your provider.

WOLVERINE BLEND™

Performance · Tissue Repair · Recovery

BPC-157 10 mg + TB-500 10 mg · 3 mL Prefilled Injectable Pen

WHAT IT IS

A compounded injectable peptide blend designed to support soft tissue repair, recovery, mobility, and performance optimization.

HOW IT WORKS

BPC-157 supports tendon, ligament, and muscle healing. TB-500 enhances cellular repair, flexibility, and recovery from training or injury.

KEY BENEFITS

- Supports tendon, ligament & muscle repair
- Accelerates recovery from training or injury
- Enhances mobility and flexibility
- Optimizes athletic performance
- Promotes systemic cellular regeneration

 Typically lasts 6 weeks · Subcutaneous use only · Store refrigerated

COMMON SIDE EFFECTS

Injection-site redness/swelling · Mild nausea · Headache · Fatigue · Dizziness (rare)

CONTRAINDICATIONS: Active malignancy · Pregnancy / breastfeeding · Known peptide hypersensitivity

 Allergic reaction warning: If you experience itching, rash, swelling, hives, shortness of breath, or dizziness — discontinue immediately and seek medical attention.

DOSING GUIDE

PEN CONCENTRATION

BPC-157 10 mg + TB-500 10 mg · 3 mL · 10 clicks = 0.1 mL

PER DOSE (10 clicks)

≈ 333 mcg BPC-157 + ≈ 333 mcg TB-500

AMOUNT: 10 clicks (0.1 mL) subcutaneously

TIMING: Nightly — right before bed

SCHEDULE: 5 consecutive days ON · 2 days OFF

DURATION: ~6 weeks per pen

Dosing may be individualized by your provider.

TESAMORELIN™ — GH SUPPORT BLEND

Growth Hormone-Releasing Hormone Analog · Body Composition · Metabolic Health

Tesamorelin 30 mg · 3 mL Prefilled Injectable Pen · 1 mg per dose

WHAT IT IS

A compounded injectable peptide designed to stimulate natural growth hormone production to support body composition, metabolic health, recovery, and vitality.

HOW IT WORKS

Tesamorelin is a GHRH analog that stimulates the pituitary gland to increase endogenous growth hormone production, supporting fat metabolism, muscle preservation, and tissue repair.

KEY BENEFITS

- Reduces visceral and abdominal fat
- Preserves lean muscle mass
- Supports metabolic health and insulin sensitivity
- Enhances tissue repair and recovery
- Improves energy, vitality, and body composition

 Typically lasts 6 weeks · Subcutaneous use only · Store refrigerated

COMMON SIDE EFFECTS

Injection-site pain/redness · Flushing · Headache · Nausea · Dizziness · Water retention · Joint pain (rare)

CONTRAINDICATIONS: Active malignancy · Untreated hypothyroidism · Pregnancy / breastfeeding · Pituitary tumors · Diabetic retinopathy

 **Allergic reaction warning:** Discontinue immediately and seek medical attention if you experience itching, rash, swelling, hives, or shortness of breath.

DOSING GUIDE

PEN CONCENTRATION

Tesamorelin 30 mg · 3 mL · 10 clicks = 0.1 mL

PER DOSE (10 clicks)

≈ **1 mg Tesamorelin**

AMOUNT: 10 clicks (0.1 mL) subcutaneously

TIMING: Nightly injection

SCHEDULE: 5 consecutive days ON · 2 days OFF

DURATION: ~6 weeks per pen

Dosing may be individualized by your provider.

SERMORELIN™ — GH SUPPORT PEPTIDE

Growth Hormone-Releasing Hormone Analog · Anti-Aging · Sleep · Body Composition

Sermorelin 10 mg · 3 mL Prefilled Injectable Pen · ≈ 0.33 mg per dose

WHAT IT IS

A compounded injectable peptide designed to stimulate natural growth hormone production to support body composition, metabolic health, recovery, and vitality.

HOW IT WORKS

Sermorelin is a GHRH analog that stimulates the pituitary gland to increase endogenous GH production, supporting fat metabolism, muscle preservation, tissue repair, and healthy aging.

WHY USE SERMORELIN™?

- Increased lean muscle mass and strength
- Enhanced fat loss and improved body composition
- Improved recovery from workouts or injuries
- Deeper, more restorative sleep
- Anti-aging support — skin quality, energy, cognitive function
- Supports natural hormone balance without suppressing endogenous production

 Typically lasts ~30 days · Subcutaneous use only · Store refrigerated

COMMON SIDE EFFECTS

Injection-site pain/redness · Flushing · Headache · Nausea · Dizziness · Water retention · Joint aches (rare)

CONTRAINDICATIONS: Active malignancy · Untreated hypothyroidism · Pregnancy / breastfeeding · Pituitary tumors

 Allergic reaction warning: Discontinue immediately and seek medical attention if you experience itching, rash, swelling, hives, or shortness of breath.

DOSING GUIDE

PEN CONCENTRATION

Sermorelin 10 mg · 3 mL · 10 clicks = 0.1 mL

PER DOSE (10 clicks)

≈ 0.33 mg Sermorelin

AMOUNT: 10 clicks (0.1 mL) subcutaneously

TIMING: Right before bedtime — aligns with natural GH release cycle

SCHEDULE: 5 nights ON · 2 nights OFF

DURATION: ~30 days per pen

Dosing may be individualized by your provider.

PERFORMANCE & RECOVERY

Tissue Repair · Athletic Performance · Post-Injury Rehabilitation

BPC-157 · TB-500 · GHK-Cu · KPV · CJC-1295 · Ipamorelin · Tesamorelin · MOTS-C

WOLVERINE BLEND™

BPC-157 + TB-500

Tendon & ligament repair · Muscle recovery · Mobility · Athletic performance

\$—

RECOVERY BLEND™

BPC-157 + TB-500 + GHK-Cu + KPV

Deep tissue repair · Collagen · Anti-inflammatory · Post-surgery recovery

\$299

GLOW BLEND™

BPC-157 + TB-500 + GHK-Cu

Collagen stimulation · Skin elasticity · Hair follicle support · Anti-aging

SINGLE PEPTIDES — INJECTABLES

Peptide	Concentration / Size	Primary Indications
BPC-157	3 mg/mL · 5 mL	Tissue repair · Gut healing · Muscle recovery · Neuroprotection
TB-500	3 mg/mL · 5 mL	Cellular regeneration · Flexibility · Systemic recovery
GHK-Cu	10 mg/mL · 5 mL	Collagen · Elastin · Hair follicle regeneration · Anti-inflammatory
MOTS-C	2 mg/mL · 5 mL	Mitochondrial · AMPK activation · Fat oxidation · Longevity
Tesamorelin	3 mg/mL · 5 mL	GHRH analog · Visceral fat reduction · GH support

SKIN, ANTI-AGING & LONGEVITY

Cellular Rejuvenation · Collagen Synthesis · Telomere Support · Longevity Optimization

GHK-Cu · Epithalon · Thymosin Alpha-1 · NAD+ · Glutathione · DSIP · B12

LOOK YOUNGER.

LIVE LONGER.

Our longevity and aesthetic peptides target the biological mechanisms of aging — stimulating collagen, lengthening telomeres, enhancing mitochondrial function, and activating the body's own regenerative pathways.

GHK-Cu

Copper peptide — collagen synthesis, hair follicle regen, anti-inflammatory

EPITHALON

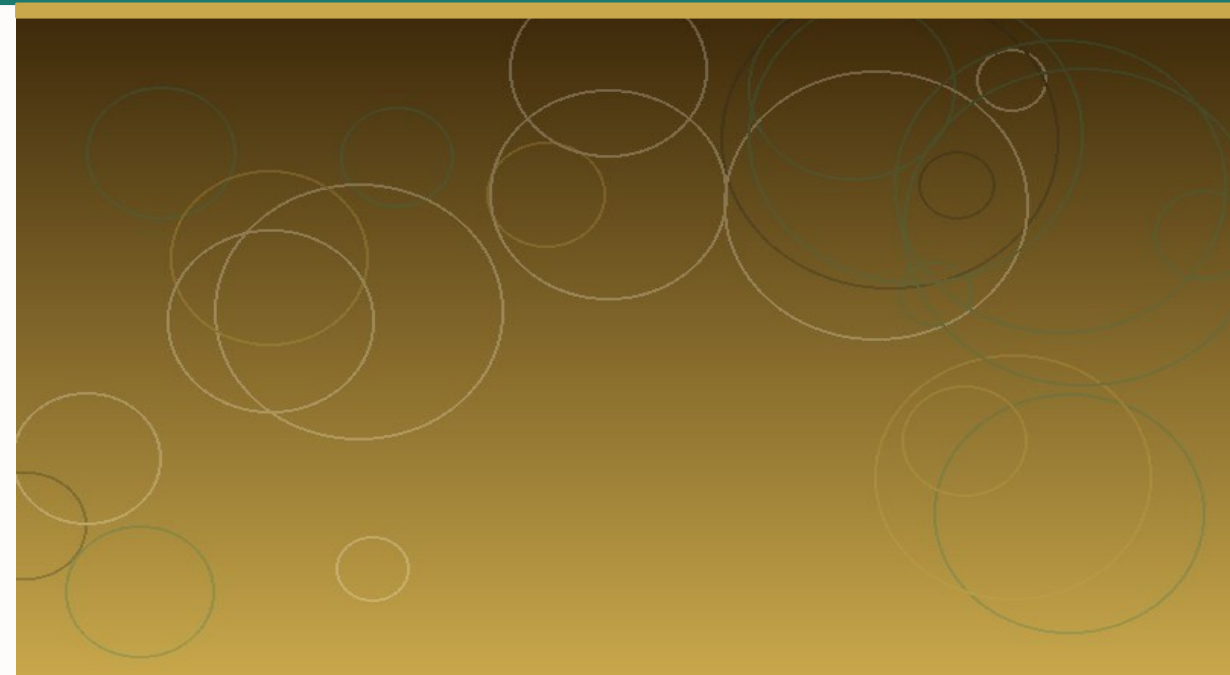

Tetrapeptide — telomere elongation, pineal regulation, immune modulation

THYMOSIN a-1

Thymic peptide — T-cell modulation, immune enhancement, viral defense

GLUTATHIONE

Master antioxidant — detox, skin brightening, oxidative stress defense

SLEEP, COGNITIVE & ENERGY PEPTIDES

Product	Concentration / Size	Primary Benefits
DSIP	1 mg/mL · 5 mL	Sleep quality · REM · Cortisol normalization · Physical & cognitive recovery
NAD+	100-200 mg/mL · 6-10 mL	Cellular energy · DNA repair · Cognition · Healthy aging

HORMONE & SEXUAL HEALTH

Growth Hormone · Testosterone Support · Fertility · Sexual Wellness

Sermorelin · Tesamorelin · CJC-1295 · Ipamorelin · Gonadorelin · Kisspeptin · PT-141 · MK-677

Sermorelin

3 mg/mL · 5 mL | 2.5 mg/mL · 6 mL

GHRH analog · Natural GH pulses · Lean muscle · Deep sleep · Anti-aging

Tesamorelin

3 mg/mL · 5 mL

GHRH analog · Visceral fat reduction · Metabolic health · Muscle preservation

CJC-1295 + Ipamorelin

1.2/2 mg/mL · 5 mL

Synergistic GHRH+GHRP · Extended GH pulse · Recovery · Sleep quality

Tesamorelin + Ipamorelin

3/2 mg/mL · 5 mL

Potent GH combo · Fat loss · Body composition · Sleep quality

SEXUAL HEALTH & HORMONE SUPPORT

Product	Concentration	Indications	Common Side Effects
PT-141 (Bremelanotide)	2 mg/mL · 5 mL	Libido · Arousal · Erectile function · Both genders · CNS-acting	Nausea · Flushing · Headache · BP elevation · Hyperpigmentation
Gonadorelin	1 mg/mL · 5 mL	LH/FSH stimulation · TRT adjunct · Fertility · Testicular preservation	Headache · Nausea · Flushing · Ovarian hyperstim (women)
Kisspeptin	1 mg/mL · 5 mL	GnRH activator · LH/FSH · Testosterone support · Fertility	Headache · Nausea · Flushing · Transient LH surge
Lipo-B (MIC + B12)	50/50/25/1 mg/mL · 10 mL	Lipid metabolism · Liver health · Fat mobilization · Energy	Nausea · Flushing · GI upset · Urine discoloration

KEY CONTRAINDICATIONS (Hormone/GH Class):

CELLULAR ENERGY & METABOLIC HEALTH

Mitochondrial Optimization · NAD+ Replenishment · Fat Oxidation · Longevity

NAD+ · MOTS-C · AOD-9604 · 5-Amino-1MQ · SLU-PP 332 · Glutathione · Lipo-B

THE SCIENCE

NAD+ (Nicotinamide Adenine Dinucleotide) declines up to 50% by age 50, driving fatigue, cognitive decline, and metabolic dysfunction. Our portfolio of mitochondrial and metabolic peptides replenishes NAD+, activates AMPK, and stimulates mitochondrial biogenesis — restoring cellular vitality from the inside out.

NAD+

ATP synthesis · Sirtuin activation · DNA repair

MOTS-C

AMPK pathway · Glucose utilization · Fat oxidation

5-Amino-1MQ

NNMT inhibitor · NAD+ elevation · Fat cell metabolism

AOD-9604

HGH fragment 176-191
Fat metabolism · No IGF-1

SLU-PP 332

ERR agonist · Mitochondrial biogenesis · Exercise mimetic

Lipo-B

MIC + B12 · Lipid mobilization · Liver health

COMPLETE CELLULAR ENERGY & METABOLIC PRODUCTS

Product	Concentration	Size	Route	Indications
NAD+ Injectable	100-200 mg/mL	6-10 mL vial	SubQ / IV	Energy · Cognition · DNA repair · Mitochondrial health
NAD+ (503B 1200mg)	200 mg/mL	6 mL vial	SubQ / IV	High-dose batch formulation for clinic protocols
Glutathione (2000mg)	200 mg/mL	10 mL vial	SubQ / IV	Antioxidant · Liver detox · Skin brightening
MOTS-C	2 mg/mL	5 mL vial	SubQ	Mitochondrial · Insulin sensitivity · Fat loss
AOD-9604	1.2 mg/mL	5 mL vial	SubQ	Fat metabolism · Cartilage · No anabolic effect
5-Amino-1MQ (oral)	50 mg/cap	Capsule	Oral	NNMT inhibitor · NAD+ elevation · Fat cell metabolism
SLU-PP 332 (oral)	250 mcg/cap	Capsule	Oral	ERR agonist · Endurance · Mitochondrial biogenesis
SLU-PP 332 + BAM (combo)	100mcg/15mg	Capsule	Oral	Exercise mimetic + metabolic support combination

ORAL, SUBLINGUAL & COMBO PRODUCTS

Capsules · Sublingual Liquids · Combo Blends · Needle-Free Options

Patient-preferred delivery formats for compliance and convenience

ORAL CAPSULES

Product	Dose / Form	Primary Indications	Side Effects
BPC-157 Oral	500 mcg/cap	GI healing · Leaky gut · IBD · Systemic repair	Mild nausea · GI discomfort
Ondansetron 4 mg	4 mg/tab	Anti-nausea · GLP-1 side-effect mitigation · Chemotherapy	Headache · Constipation · QT prolongation (rare)
5-Amino-1MQ	50 mg/cap	NAD+ elevation · Fat loss · Metabolic · Anti-aging	GI discomfort · Headache · Nausea
MK-677 / Ibutamoren	25 mg/cap	GH/IGF-1 elevation · Lean muscle · Sleep · Bone density	Appetite increase · Water retention · Insulin resistance
Dihexa	5 mg/cap	Cognitive enhancement · Neuroplasticity · Memory · CNS repair	Headache · GI discomfort · Vivid dreams
SLU-PP 332	250 mcg/cap	Exercise mimetic · Fat oxidation · Mitochondria	GI discomfort · Headache · Fatigue
SLU-PP 332 + BAM	100mcg/15mg	Metabolic combo · Exercise mimetic + BAM support	GI discomfort · Headache · Possible cardiac risk (high dose)
Dihexa + Tesofensine	5mg/500mcg	Nootropic + weight loss · Cognition + appetite suppression	HR elevation · Hypertension · Insomnia · Dry mouth

SUBLINGUAL LIQUIDS — NEEDLE-FREE DELIVERY

Sublingual Semaglutide

2 / 4 / 6 / 8 / 10 mg · 8 mL each

Full GLP-1 weight management dose range. No injection required — absorbed under tongue for fast onset.

Sublingual Tirzepatide

5 / 10 / 15 / 20 / 25 / 30 mg · 8 mL each

Complete dual-agonist sublingual titration range. Needle-free alternative to injectable tirzepatide.

Sublingual Tirzepatide + NAD+

5 / 7.5 / 10 / 12.5 / 15 / 17.5 mg Tirz + 100 mg NAD+ · 8 mL

Unique combination: GLP-1+GIP weight management combined with NAD+ cellular energy support in one formulation.

SIGNATURE INJECTABLE COMBO BLENDS — All 5 mL vials · Physician prescription required

DSIP+BPC-157+CJC-1295 · GHK-Cu+Epithalon · Pinealon+PE22-28+Selank · Semax+Selank · BPC+KPV+TB-500 · BPC+GHK-Cu+KPV+TB-500

HOW TO PARTNER

WITH WELLNESS TECH BIO DISTRIBUTION

01

PRACTICE VERIFICATION

Submit your medical license, DEA registration, and practice documentation for verification. All ordering accounts require active physician credentials.

02

ACCOUNT SETUP

Our team will onboard your practice with a dedicated account representative, pricing schedule, and access to our full product catalog and ordering portal.

03

PATIENT PRESCRIPTIONS

All orders require valid patient-specific prescriptions (503A) or a standing order protocol (503B). No direct-to-consumer sales.

04

ORDER & FULFILLMENT

Place orders through our secure portal. Products are compounded, quality-tested, and shipped with cold-chain packaging where required.

05

CLINICAL SUPPORT

Our clinical team assists with dosing protocols, product selection, patient education materials, and regulatory compliance guidance.
